What is PBMC isolation?

Huscience is GCLP certified Central Lab providing analysis services specific to clinical trials for the new drug development. Based on state-of-the-art equipment and a skilled manpower, it complies with domestic & international quality control standards and delivers reliable results.

PBMC's

Lymphocyte | Monocyte | Macrophage

Isolation Process

Our Service

- Sample processing tailored to the project
- PBMC isolation tailored to the project
- PBMC resource management system (barcode system)

Why Huscience?

- Huscience uses Ficoll® analysis, which is a standard practice of PBMC isolation.
- Due to a characteristic of PBMC, it should be conducted until 24 hours. Huscience can handle it.
- To raise the successful rate of PBMC, proficient researchers in Huscience conduct this process.
- Huscience certified ISBER(PBMC) to improve customer trust and analysis quality.
- Huscience use a data logger system to maintain Freshness of PBMC.

ISBER(PBMC)
